

The savings speak

for themselves.....

	Typical 500mm Basket machine		Evolution
	Standard Temperature	Low Temperature	
Water Used (litres per day)	135	135	87.5
Initial boiler heat (minutes)	5.24	3.85	3.85
Total heat time (minutes)	20.98	16.08	9.97
Chemical cost per day (£1.20 per litre)	0.16p	0.16p	0.11p
Water cost per day (£2.58 per cubic litre)	0.35p	0.35p	0.23p
Electricity cost per day (£0.055 per KWh)	0.63p	0.48p	0.34
Cost per day	£1.14	£0.99	£0.67
Cost per week	£7.97	£6.92	£4.69
Annual cost	£415.48	£360.73	£244.77
Annual Savings		£54.75	£170.72
Saving		13%	41%

How is this done?

Other companies produce excess wasted energy and then look for ways to reclaim it. Maidaid Halcyon has researched how to avoid producing excess energy in the first place, the benefits are clear to see in your bottom line.

With just one Evolution machine you can see the benefits, now these figures are based on a brand new alternative machine with new elements and boilers. Just think how old your machine is and how inefficient it may be. If you need more than one machine then the savings you make are easy to see.

With the two year manufacturer's warranty your Evolution machine will not only give you peace of mind against breakdown but you will also be doing your bit for the environment.
